Creston Golf Club
Water Management Project Update

The RDCK Board approved our Community Works Grant application at its June 20 board meeting, we have completed the paperwork and are awaiting the money. We have met with Sullivan Stone and established a timeline for the work. We will undertake to complete the excavation of the new pond and wet well starting around the end of August. The balance of the project will be undertaken throughout the winter and early spring so that the pond can receive spring runoff and we can use it for irrigation thereafter.

The right side of the 13th and 14th holes will be a construction zone from the end of August throughout the fall period. We will be installing a construction fence along the right side of the 14th hole and ask that you not enter the construction area. Should you lose a ball in the construction area, drop a ball no nearer the hole than where it crossed the "ground under repair" line and continue play.

Thank you for your cooperation.
